Lyftman Rail Profile

Product information

General: TAWI offers four basic rail profiles with four additional capacities using a support structure on top of our steel tracks. From simple lighter aluminum systems to complex heavy duty steel installations.
Our aluminum profiles LR86 and LR113 are for quick and smooth manual operation for lighter lifting up to 125 kg. By choosing these you achieve flexibility and reduce applied forces to the ceiling structure.
Our steel profiles LR120 and LR170 are the strong and ergonomical choice, ideal for any heavier weight applications in any working environment. Suitable when increased suspension distance is required.
Our track is formed from a single piece of cold rolled high strength steel. NO weldments means less wear! The result is little manual strain and good ergonomics
