# High Speed Flexible Vacuum Lifter

## Product information

**General:** The VacuCobra is ergonomically designed and optimal for high speed lifting. It is a versatile lifting aid in high frequency distribution centers where fast and ergonomic lifting is necessary. Intense and ergonomic lifting is a possibility with the VacuCobra.
The one handed and easy to use operation allows the operator to maintain a high lifting frequency without any strain. It is ideal for end of line packing load, roll cage loading and cargo.
VacuCobra is specifically designed to quickly lift boxes of different size and shape weighing up to 50 kg. Higher precision is achieved by adding a swivel function integrated in both the top and bottom of the tube lifter. 360 degree rotation of the suction cup makes it easy to position goods without straining shoulders and back
