Electric Winch PullzAll

Product information

PullzAll electric winches are an attractive alternative to chain hoists and hand winches. It can lift up to 454 kg. The variable speed control turns this winch into a great tool for precision work.

Its small size and light weight make it an obvious standard tool in every workshop and craftsman's van.

Properties:

- Electronic overload limiter built-in.
- 4V (Battery): The battery model is a perfect choice for work on sites where no power is available.
- 230V: The model you can always find power for.
