Lifting Solutions Group
Axel Johnson International

# Elaskon 30

## Product information

**General:** ELASKON products provide excellent corrosion protection for the wires that make up the rope. In addition the rope is lubricated to counteract the metallic abrasion caused by the wires rubbing together. All of this contributes significantly to an extension of a rope wire's lifetime. Whether for cable railways or lifts, or for ropes used in elevators or cranes, ELASKON provides the right conservation agent and lubricant for every application.
