Wire rope pullers

Product information

RVT900
A light but strong puller with a fixed 2-line system with a draw capacity of 2 t. The operation is based on a mechanical ratchet lever brake without a reversing function.

RVT2000
A sturdy puller with a convertible configuration between a 1- and 2-line system. The pulling capacity is 2 t and the length is about 3 m when the cable is simple. If the cable is attached to the frame with a hook, i.e. doubled, the pulling capacity is then 4 t and the length is about 1.5 m. The operation is based on a mechanical ratchet lever brake without a reversing function.
