

## Harness NEWTON, Petzl

### Product information

The NEWTON fall arrest harness is comfortable for work and easy to use.

- anatomical design is close-fitting, while giving optimal freedom of movement.
- allows installation of a LIFT spreader for descending in an upright position.

#### Features:

- color-coded straps (yellow/black) provide rapid identification of the upper and lower parts of the harness before donning.
- sternal FAST automatic buckle allows the harness to be opened and closed simply and quickly.
- shoulder straps and leg loops equipped with self-locking DOUBLEBACK buckles for quick and easy adjustment.

#### Attachment points:

- Sternal attachment point: fall arrest system attachment
- Dorsal attachment point: fall arrest system attachment

**Material:** Nylon, polyester, aluminum, steel.

**Marking:** According to standard, CE-marked, UKCA-marked

**Temperature range:** -40°C up to 80°C

**Standard:** EN 361

## Blueprint

Sizes / Tailles

The diagram shows a human silhouette with three measurement points: A (chest), B (height), and C (waist). A vertical line on the right side of the silhouette is labeled B, indicating height. A horizontal line across the chest is labeled A, indicating chest circumference. A horizontal line across the waist is labeled C, indicating waist circumference.
