

Vacuum Beams AEROLIFT

Product information

Standard Vacuum Beams

Our standard vacuum lifting beams are designed for lifting smooth and air-tight plates. The lifting beams are typically used for lifting steel and aluminium plates, but can also lift synthetic plates, glass fibre, PVC and other air-tight items without problems.

The lifting beams are designed from heavy and hard-wearing materials for use in tough / adverse industrial environments without influence on the life expectancy.

Part code

5605
