Descender RIG Petzl

Product information

The Petzl RIG descender is a self-braking rope control device designed for experienced users in rope access and technical rescue. It enables controlled descent, secure positioning, and efficient rope handling during complex work at height. The integrated AUTO-LOCK system supports hands-free positioning without additional tie-off.

Best for:

- Rope access work requiring controlled descent and positioning
- Technical rescue and complex rope systems with frequent anchor passing

Product benefits:

- AUTO-LOCK system enables hands-free work positioning without tie-off
- Ergonomic handle improves descent control and grip during operation
- Openable side plate allows easy passage of intermediate anchors
- Dual friction modes increase control and reduce rope twisting
- Reinforced wear zones extend service life under intensive use
