Mobile Fall Arrester ASAP® LOCK Petzl

Product information

The Petzl ASAP LOCK is a mobile fall arrester designed for use on flexible safety ropes in rope access and fall arrest systems. It provides continuous fall protection by automatically following the user and locking on the rope in the event of a fall or uncontrolled descent. The integrated locking function allows the device to be fixed in position to help limit potential fall distance in specific work situations.

When to choose this product

Best for:

- Rope access work requiring continuous hands-free fall protection
- Systems where reduced fall distance or position locking is needed

Not ideal for:

- Use without a compatible energy absorber or certified rope system

Product benefits

- Automatic trailing on rope reduces manual handling during ascent and descent
- Locks on rope during fall, even if device is grabbed
- Integrated LOCK function limits movement to reduce potential fall distance
- Connection arm design improves stability when passing intermediate anchors
- Operates on vertical, horizontal, or angled ropes for flexible use

Use in combination with:

- ASAP'SORBER AXESS energy absorber for use in two-person rescue scenarios, up to 250 kg
- ASAP'SORBER 20/40 energy absorber, for use with a person weighing up to 140 kg
