

Waterproof Dry Bag 4552

Product information

The 100% waterproof dry bag is a 30 L equipment backpack designed for storing and transporting equipment in wet environments while keeping contents protected from water exposure. Its welded tarpaulin construction, roll-top closure and backpack carrying system make it suitable for personnel who need hands-free transport of essential gear.

Best used for:

- Transporting equipment, clothing or supplies in wet outdoor or industrial environments.
- Applications requiring waterproof storage combined with backpack-style carrying.

Product benefits:

- Welded 0.5 mm tarpaulin construction provides waterproof protection.
- Roll-top closure with buckle helps maintain a watertight seal.
- Adjustable shoulder straps enable comfortable backpack carrying.
- Side handles improve lifting and handling during transport.
- Large single compartment simplifies packing and equipment access
