Small Drum Bag for Rope Access 2940

Product information

The EMG 2940 is a compact lifting bag designed for rope access technicians and other professionals who need to hoist tools and equipment safely while working at height. Its drum-shaped design combines organized storage with controlled lifting, making it suitable for maintenance, inspection, and industrial access applications where space and handling efficiency are important.

Best used for:

- Rope access work requiring compact tool and equipment transport.
- Hoisting tools and small spare parts during maintenance and inspection tasks.

Product benefits:

- Compact drum design suited to confined work environments.
- Internal dividers create four compartments for organized storage.
- Six external pockets provide quick access to frequently used tools.
- Hard plastic bottom supports load distribution and shape retention.
- Replaceable bottom and durable PVC-coated polyester construction support longer service life.
