Lifting Device - Hollow-core Slab Lifting Clamp

Product information

The hollow-core slab lifting clamp is designed for lifting and horizontal handling of hollow-core concrete slabs. The clamp must only be used in pairs with another identical clamp and in combination with a suitable lifting beam.

Maximum slab width in the upper gripping area: 1150 mm
Minimum slab width in the upper gripping area: 1100 mm

Best used for:

- Horizontal handling of hollow-core concrete slabs.

To ensure safe lifting of panels, safety chains must always be used and secured underneath the panel. This prevents the panel from falling in the event that it accidentally slips out of the clamps' grip.
