Brake Winch RUP 503-DT

Product information

The RUP503-DT brake winch is a cargo winch designed for lifting loads up to 1000 kg. It mounts directly to the side plate of compatible small and medium support frames, providing a practical lifting solution for supported load-handling applications.

Best used for:

- Lifting loads up to 1000 kg on compatible support frames.
- Installations requiring a side-mounted winch

Product benefits:

- 1000 kg lifting capacity supports demanding cargo-handling applications.
- Galvanized, powder-painted steel improves protection against surface corrosion.
- Side-plate mounting supports integration with small and medium frames.
- Compatible with Gantry Cranes ASB/LSB for supported system configurations
