Offshore Lifting Backpack 4390

Product information

The EMG 4390 offshore lifting backpack is a 30 L equipment bag designed for carrying and hoisting tools and personal equipment in offshore and industrial environments. With a working load limit (WLL) of 25 kg, it combines padded storage compartments with a dedicated lifting strap for transferring equipment between work levels. Its water-repellent tarpaulin construction helps protect contents against rain and water spray.

Best used for:

- Offshore operations requiring equipment transport by backpack and hoist.
- Industrial work environments where organized storage and protected equipment handling are important.

Product benefits:

- 25 kg WLL and 30 L capacity support defined equipment lifting requirements.
- Conforms to ISO 21898 and EN 1492-1 for documented lifting requirements.
- Detachable shoulder straps and three carabiners help secure the backpack during hoisting.
- Three padded main compartments, 11 smaller compartments and laptop storage organize equipment.
- Molded PE base protects against rough surfaces and allows upright positioning
