OX Spreader Beams

Product information

OX modular beams have a complete range of modules that allow for on-site assembly. You can use one or more modular beams, with lengths from 1 to 24m and lifting capacities from 2 to 400 tons.

- manufactured in accordance with existing standards.
- reduced size and weight, which facilitates storage, transportation and installation costs.
- easy and quick assembly if you use the instruction manual.
- Annual inspection is mandatory.
- this modular system can be adapted to your needs to perform any lifting work.
- we can supply shackles with different lifting capacities so that you can use the modular system more conveniently.

... *Read more*

Material: The material we have used is: S275 for beams and S355 for the rest of materials. We can design spreader beams in high elastic limit depending on the customer premises.
Finish: The finish of our products is sandblasted Sa 2,5 in accordance with ISO 8503-2:1.996 norms. Afterwards, a 50 micras thick of polyurethane epoxi primer (RAL 1028).
